The **NEW**  
Lord Sampler

## The NEW Soilmoisture Lord Sampler

If you are a consultant, grower, soils tech, or farm manager, that requires extensive soil sampling, then it's time to treat yourself to a new and better sampling tool. A tool that is light and easy on the back, tough as you and works with you instead of against you.

Modular construction of our new Lord Sampler, makes it a snap to change tips or replace the coring section. It is available in rugged chrom moly steel with a black oxidized finish or in stainless steel - both with a super hardend tip for the many holes you'll be making.

→ Top handle weldment assures sturdy push platform with non-wetting comfortable foam handle grips.

→ Rugged, aluminum tubing with solid support connector shaft wont twist, turn or bend... basically gorilla proof!

→ Unit marked in 6" increments to assure desired depth of sample.

→ Roll pins allow for cost saving modular replacement of sub-parts.

→ Sharp edge coring tip.

## FEATURES:

- 38" (0.97 m) / 50" (1.3 m) in overall length
- 1" (2.5cm) shaft
- 1.310" (3.3 cm) handle plus
- 1" diameter tubing (.100 thick wall)
- Tough chrome molly tubing with a black oxide finish
- Replaceable cutting tip is made of heat treated stainless steel

TOUGH, DURABLE AND LIGHT WEIGHT!

The **ULTIMATE** Professional Sampler!
